This Week

We began this week our text 'We're Going on a Dinosaur Hunt'. We thought about what we would take with us on a dinosaur hunt in our backpacks. We then wrote a list of items to pack e.g. a map! We have worked on our dinosaur dancing and are beginning to put some movements together. In Maths we practised our adding and subtracting using dinosaurs, and we used bricks to measure how long our dinosaurs were...or how short! We used the story we know to start to write our own stories, changing just a few things to make them our own. We had World Book Day on Thursday, where the children took part in various different activities. We have really enjoyed hearing about the children's 'Supertato' models.

Next Week

Next week we will be using our listening skills and watching how someone draws a dinosaur step by step. The children will have their clipboards at the ready to follow the instructions to draw their own dinosaurs. We will be measuring dinosaur bones using a number line and recapping on the language of length and height. We will be muddling up some simple sentences, encouraging the children check their reading makes sense. We will also be exploring the concept of number bonds to 10 using the part-part-whole method. Hopefully your children will be able to explain this to you when we finish next week!
